

Key Vocabulary	
germination	When the conditions are right, a seed soaks up water and swells, and a tiny new plant bursts out of its shell. This is germination .
shoot	A shoot grows upwards from a seed towards sunlight.
seed dispersal	Seed dispersal is when the seeds move away from the plant. They can be dropped to the ground or moved by the wind or animals.
sunlight	All plants need the sun to grow. Some need lots of sunlight , others just a little.
water	All plants need water . Without water they will not <i>germinate</i> .
nutrition	Food. Plants make their own food using <i>sunlight</i> .
temperature	How hot or cold something is. Some plants like warmer temperatures , others like cooler temperatures .

Key Knowledge

Life Cycle of a Plant
